

Eleanna Avouri

Early Stage Researcher (ESR)

Eleanna Avouri is an Early Stage Researcher focusing on issues of Digital Preservation and their intersection with Use and Reuse. She is an archaeologist and a cultural heritage management specialist with rich experience on an international academic level in Greece, England, France and Italy (MA in Cultural Heritage Management, National and Kapodistrian University of Athens, Patras University, University of the Aegean). Her research interests focus on new media and digital applications in the field of cultural heritage, including the entire range from tangible to intangible assets. She was actively involved in several archaeology outreach initiatives and museum-education programs and has cooperated with architects and IT designers in projects promoting multidisciplinary approaches on cultural heritage.
