

Harriet Clifflen

Early Stage Researcher (ESR)

Harriet Clifflen is an Early Stage Researcher in the area of Data Processing. She has a background in Archaeology, with a BA from the University of Manchester, and an MSc from the University of Liverpool. Her previous work has focused on materials analysis, with recent research projects on the use of X-Radiography to image the interior structures of Bronze Age Cypriot ceramic vessels, to identify production techniques. She also has experience in field archaeology, having worked at the Cypriot sites of Kissonerga-Skalia and Erimi, working both on site and recording ceramics and small finds.
