

# Digital Heritage Research Lab

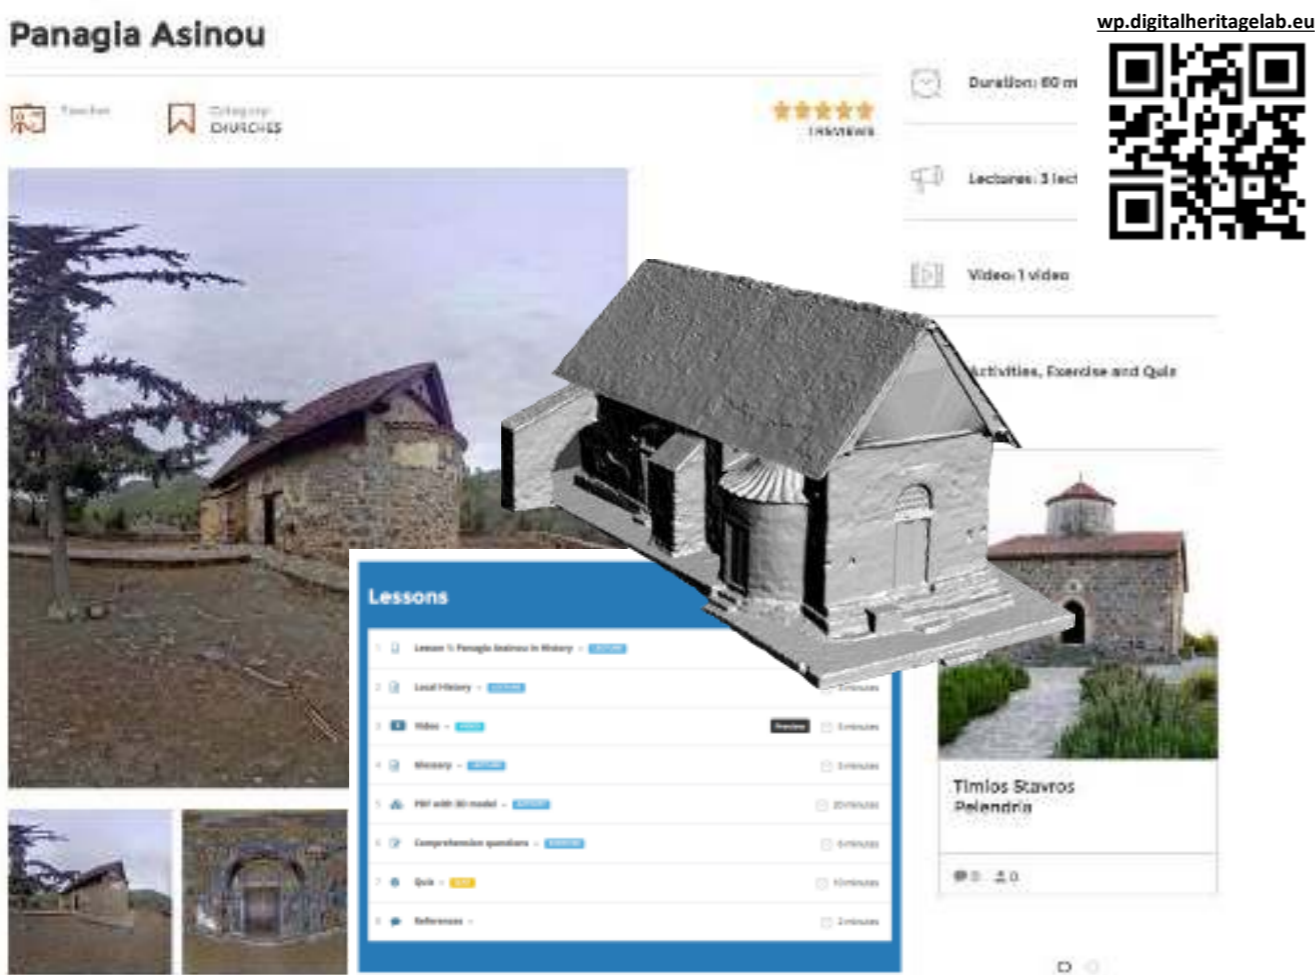

An interactive book which

**"narrates" digitally the history of the monument**

The installation is based on a mix of hardware and peripherals such as *projector, touch foil, camera and software*  
"The multipurpose toolkit **VVVV**"

Digital puzzles,  
Video narratives,  
Three-dimensional models,  
help you discover the monument and its story

An e-Learning platform promoting WHL UNESCO monuments in Cyprus where **every monument is a Course**

...addressed to different age groups The system uses innovative digital heritage resources to holistically educate people about the different phases of the monument, their history, the architectural value and the conservation stage in a UX friendly way. It is currently being evaluated by its potential users.

The Digital Heritage Research Lab of the **Cyprus University of Technology** was established in 2013 and it is the first and so far the only one on the island of Cyprus that specializes in the field of Cultural Informatics.

Our aim is to explore issues such as **digitization, archiving, preservation, use/reuse and protection of tangible and intangible** remains of our cultural heritage and regional cultural past. Moreover, the lab focuses on how the latest technological developments can deliver this legacy to all people and communities on the Island.

Therefore, we collaborate with all relevant private and public sectors and in the EU the lab cooperates with a network of at least 150 leading partners from the academic, research and industrial CH sectors working towards the development of new tools and smart applications.

Behind us is the memory of our parents,

in front of us are the eyes of our children!
