Cyprus University of Technology

Sept 2017 - On Going

- Present Bachelor's degree in Computer Engineering and Informatics
Thesis: Implementation of a 3D Video Game App on local ancient Cultural Heritage sites and monuments.

PROJECTS

- **Gym App:** For course purposes (Mobile Computing), we developed an Android application, using Android Studio, for many companies, in which anyone who downloads the application will be able to find the suitable gym for him or her. First, in the application have a register form for anyone who download the app. The application has information from all gyms, the classes with their information that provided and the monthly payment for each user based on his or her selections. Additionally, the client in the application can rate the application and the gyms.
- **Software Engineering Website and System:** For course purposes (Professional Practice in Software Engineering), we developed a Web Application and an Advertising Website, using Visual Studio code, for a new dance school company. The application has admin panel, Project Manager panel and employee panel. Admin can add, edit, delete Managers and employees, creating the schedule of their projects, making progress through System availabilities, for people to see outside at website, managing the payroll for working hours of every project, and viewing different types of reports.
