Why do we preserve?

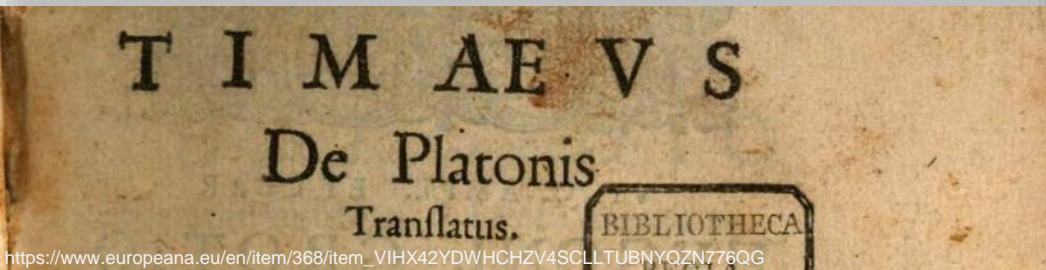

74 ΠΛΑΤΩΝΟΣ

ἴδιον παράλαξαι καὶ διὰ μακρῶν χρόνων γιγνομένη τῶν ἐπι γῆς πολλῶν φθορᾶ. Τότε οὖν δοσι καὶ ὄρη καὶ ἐν ἕρημοῖς τόποις καὶ ἐν ἕρῳσι οἰκοῦσι, μᾶλλον διόλουται τῶν ποταμῶν καὶ θαλάττῃ προσοικούντων· ἡμῖν δὲ ὁ Νεῖλος εἰς τε τὰ ἄλλα σωτηρ καὶ τότε ἐκ ταύτης τῆς ἀπορίας αὐτῶν λυόμενος. Ὅταν δ' αὖ θεοὶ τὴν γῆν ἕθαισι καθάριστον κατακλύσωσι, οἱ μὲν ἐν τοῖς ὄρεσι διασώζονται βουκόλοι νομαῖς τε, οἱ δ' ἐν ταῖς παρ' ἡμῖν πόλεσιν εἰς τὴν θάλατταν ὑπὸ τῶν ποταμῶν φέρονται, κατὰ δὲ τήνδε τὴν χώραν οὐτε τότε οὐτε ἄλλοτε ἔνοιθον ἐπὶ τὰς ἀρούρας ἕδωκεν ἐπιροῦ· τὸ δ' ἐναντίον κείσθην πᾶν ἑλληνίαν πέτραι· Ὅθεν καὶ δι' ἅς αἰτίας τὴνθάδε σωζόμενα λέγεται παλαιότητα. Τὸ δὲ ἀληθές, ἐν πᾶσι τοῖς τόποις, ὅπου μὴ χειρῶν ἑλπίστος ἢ καὶ μα ἀπέργει, πῶτον, τοῖς δὲ ἑλιαν ἡ γένος ἔστιν ἀνθρώπων· ὅσα δὲ ἢ παρ' ἡμῖν ἢ τῆδε ἢ καὶ καὶ ἄλλων τόπων ὧν ἀκοῆ ἴσμεν, εἴ ποὺ τί καλὸν ἢ μέγα γέγονεν ἢ καὶ τινα διαφθορὰν ἄλλην ἔχον, πάντα γεγραμμένα ἐκ παλαιοῦ τῆδ' ἔστιν ἐν τοῖς ἱεροῖς καὶ σισυρμῆται. Τὰ δὲ παρ' ἡμῖν καὶ τοῖς ἄλλοις ὅρη κατασκευασμένα ἐκαστοῖς ἐν γῆνι γράμματα καὶ ἔπιαν, ὅσῳσι πόλεις δύνανται, καὶ πάλιν δι' εἰσόδων ἐστὶν ὄπισθε νόσημα ἦκε, φερόμενον αὐτοῖς ὄρημα οὐράνιον καὶ τοῖς ἀγραμμάτων τε καὶ δημοσίων εἶπεν ἡμῶν, ὅσοι πάλιν ἐξ ἀρχῆς οἶον νῆσι γίνεσθε, οὐδὲν εἰδότες οὐτε ὧν τῆδε οὐτε τῶν παρ' ἡμῖν, ὅσα ἦν ἐν τοῖς παλαιῶν χρόνοις. Τὰ γούν νῦν δι' γενεαλογηθέντα, ὧ Σόλων, περὶ ἰσθμῶν παρ' ἡμῖν ἢ διήλθε, παιδων βροχῆ τε διαφῆει μύθων, οἱ πρῶτον μὲν ἐνα γῆς κατακλυομένων μῆμνησθε, πολλῶν ἐμπροσθεν γεγονότων, ἐπὶ δὲ τὸ κάλλιστον καὶ ἄριστον γένος ἐπ' ἀνθρώπων ἐν τῇ χώρῃ τῇ παρ' ἡμῖν οὐκ ἴστε γεγονός, ἐξ ὧν οὐ τε καὶ πάσα ἢ πό-

1) Τὰ ἐδὴ ἀκτιθέμενα περὶ περιοδικῶν κατακλυσῶν διαφθορῶν ἀπὸ δοσι ἀκτιθένται εἰς τὸν «Πλατωνικόν» (209 — c). Αἱ ἀσθένειαι τοῦ κατὰ κωνομικὰ διαστήματα μᾶς προσβάλλον εἶναι οἱ πυρετοὶ («Τίμαχος» 86a).

“...The memorials which your own and other nations have once had of the famous actions of mankind pass away in the waters at certain periods; and the rude survivors in the mountains begin again, knowing nothing of the world before the flood. (...) **The memory of them was lost**, because there was no written voice among you. For in the times before the great wars and flood Athens was the greatest...”

What do we preserve?

Montage of photos taken by Voyager 1 and Viking 1 (Saturn, Dione, Mars), with an offer letter from JPL / NASA to the Museum voor Cultuur en Wetenschap. https://www.europeana.eu/en/item/2021657/resource_document_museon_119644

- Voyager 1 and 2 **preserve** the *humankind information*: 115 images, 90' music, 21 earth sounds and greetings in 55 languages
<https://voyager.jpl.nasa.gov/golden-record/whats-on-the-record/>
- On a **golden record** (not the cloud...) with a needle and **instructions** of use (metadata!) in **symbolic language**
- Launched in 1977, they are 21 and 17 light-hours far, off the Solar System since 1990
<https://voyager.jpl.nasa.gov/mission/status/>
- Thus, **what we do not preserve** is as important (and as difficult to decide) as what we do preserve.
- **Preserve for the future**

The consequence of not preserving

NATIONAL

Most Scientific Research Data From the 1990s Is Lost Forever

A new study has found that as much as 80 percent of the raw scientific data collected by researchers in the early 1990s is gone forever, mostly because no one knows where to find it.

DANIELLE WIENER-BRONNER DECEMBER 23, 2013

The Digital Decade

- **Data, EU cloud**

Is growing beyond borders, but 80% is never used.

Archive, preserve for future re-use.

Green and within the EU.

- **Tech, AI**

Automated translation, metadata enrichment... with transparency in algorithms.

Control of personal data, EU eidentity.

- **Infrastructure**

Improve connection in rural areas, from Scandinavian Arctic to the Mediterranean islands.

20% of NextGenerationEU will be invested on digital.

The Tallinn Declaration

• Vision

Public Administrations must deliver high quality, user-centric digital public services for citizens and seamless cross-border public services for businesses.

• Seven principles

1. Digital-by-default
2. Once only
3. Trustworthiness and security
4. Openness and transparency
5. Interoperability by default
6. Horizontal enabling policy steps
7. User centricity

How is the Commission helping public and private entities build digital services which comply with EU regulations?

Standards

Our mission is to support projects to use basic components, based on standards, that ensure that systems will be able to communicate with each other.

We call these basic digital components

Building Blocks

eArchiving policy

- Digital **preservation**: in order to ensure the data re-use in years to come, we must rely on international standards, transparency, trustworthiness, interoperability.
- The **Data Governance Act** recommends the use of **Building Blocks**.
- **Reach wider**: other levels of public admin, organisations, solution providers, SMEs; and various domains, like cultural heritage, justice, finance, environment...
Call CEF-TC-2020-2 eArchiving, evaluation ongoing
- **Validation and conformance**: to encourage wider adoption of eArchiving, we will offer an *EC eArchiving Building Block conformant stamp*.

What is our role within eArchiving?

 **We are here!**

Interview

Janet Anderson
DNA Coordination Team

Carlota Bustelo
Independent Consultant
Spain

Question:

Digital Archiving is a Europe-wide challenge.

What do you think are the issues, both in Spain in particular, and in Europe more generally?

- What do we mean by digital archiving?
- Boundaries with other systems
- Two approaches in Spain
- Decide approach before using eArchiving
- Legislation
- Electronic transfer vs digital archiving
- Paper-based mindset

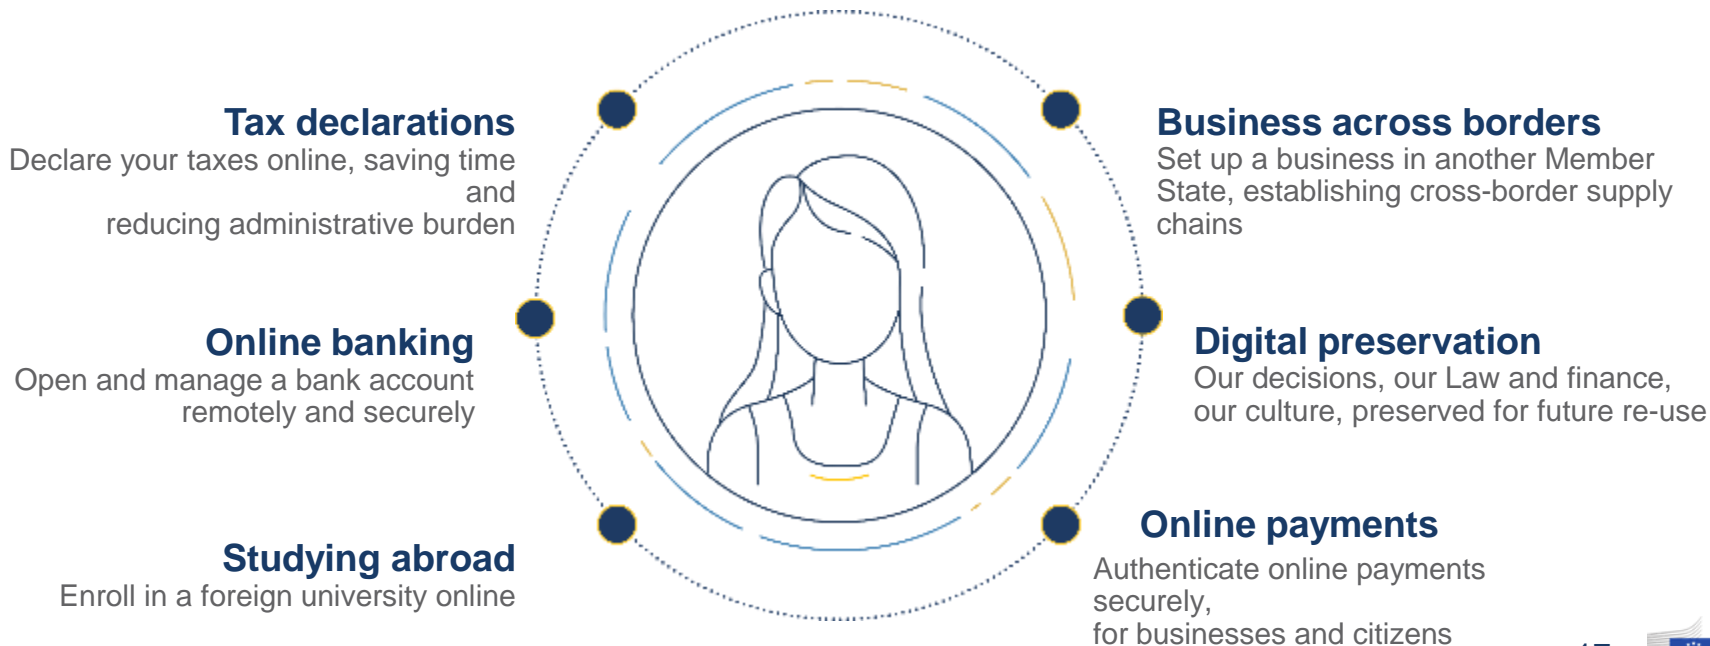

Question:

How important are standard systems for Spain and other countries in Europe in order to be able to compete in the Digital Single market?

- The most important thing!
- Compete, cooperate, interoperate
- Following the EU's lead
- eSignature, Blockchain
- Mandatory or recommended practices are useful

The Digital Single Market

A vibrant cross-border, cross-sector digital ecosystem throughout Europe that will help public administrations, private enterprises and citizens make the most of the single market.

Meet the Building Blocks

Big Data Test Infrastructure
Explore and experiment with Big Data for improved performance and decision-making.

Context Broker
Gather, manage and share context data, in real time, throughout Europe.

eArchiving
Facilitate the preservation, migration, reuse and trust of your data.

European Blockchain Services Infrastructure
Harness the power of a European-wide network of blockchain services, increasing trust through data security, privacy and transparency.

eInvoicing
Promote the implementation of the European standard for electronic invoicing across borders.

eID
Allow citizens to prove who they are across borders, making it easier to access online services in another EU Member State.

eDelivery
Exchange online data and documents reliably and securely.

eSignature
Create and verify electronic signatures between businesses and EU citizens.

Once Only Principle
Re-use data held by Public Administrations.

eTranslation
Use machine translation to translate your documents and web content into any official EU language, and many more.

What does it mean for stakeholders?

Data Producers

Archives

Solution Providers

Awareness

Sustainability

Collaboration

Data Producers

- ✓ You have valuable digital information to be kept over time
- ✓ This information is located in information systems close to be decommissioned
- ✓ Your information management strategy fails when you try to access digital information in old systems

eArchiving approach

Packaging your information in a way that could be understood overtime independently from technology

Archiving the packages in a repository or archive for managing them over time:

- You can build your own;
- You can select an external one.

Archives

- ✓ You receive digital information and don't know how to manage it
- ✓ Producers need to transfer you digital information and don't know how to do it
- ✓ You are digitising your holdings and don't know how to manage master copies
- ✓ You own a digital repository but are not sure about its usability over time

eArchiving approach

Building or improving your repository using an standardised way to ingest, archive and disseminate the information packages. Don't reinvent the wheel

Participating in a network to share your needs and experiences with other archives for finding solutions

Transfer or sharing easily your information packages with other archives when needed

Solution Providers

- ✓ Your digital archiving solution clients are asking for customisation at any time
- ✓ Your solution for managing information lacks the component of digital preservation over time
- ✓ You have a product related to digital archiving that needs to be positioned in the market

eArchiving approach

Incorporating or adapting standardised information packages to your solution

Reusing software components or develop your own validating your solution as eArchiving conformant

Marketing your products within Data Producers and Archives in a common understanding of the issue

eArchiving is not just about specs and software!!!

How to find the services

eArchiving Website

<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/eArchiving>

The screenshot shows the eArchiving website home page. At the top, there is a navigation bar with the CEF Digital logo and menu items: 'About us', 'Building Blocks', 'DSIs', and 'CONTACT US'. A search bar is also present. Below the navigation bar, the main content area features the 'eArchiving' logo and the text 'Facilitate the preservation, migration, reuse and trust of your information'. There are two buttons: 'WATCH THE VIDEO' and 'GET STARTED'. A red arrow labeled '1' points to the 'Services' menu item in the top navigation bar.

The screenshot shows the 'eArchiving Services' page. The header includes the CEF Digital logo and navigation items: 'About us', 'Building Blocks', 'DSIs', and 'CONTACT US'. The main heading is 'eArchiving Services'. Below the heading, there is a list of links: 'Technical Specifications', 'eArchiving Service Desk', 'Sample Software Portfolio', 'eArchiving Stakeholders onboarding', and 'eArchiving Knowledge centre'. A red box highlights this list. To the right, there is a section titled 'eArchiving Services' with a paragraph of text. Below this, there is a yellow vertical bar with the number '2' and the text 'Contact the CEF team'.

The data chaos

We need order in the chaos

A specification and the documents

4.1 Proposed translation schema for the INSPIRE metadata descriptions for geospatial resources in ISAD(G)

The following table displays the identified counterparts of the required INSPIRE metadata elements used in the ISAD(G) structure. Initial elements are based on the INSPIRE Metadata Implementing Rules - Technical Guidelines, based on EN ISO 19115 version 1.3, and INSPIRE Metadata Implementation Rules at: http://inspire-irc.ec.europa.eu/documents/Metadata/MD_IR_and_ISO_20131029.pdf.

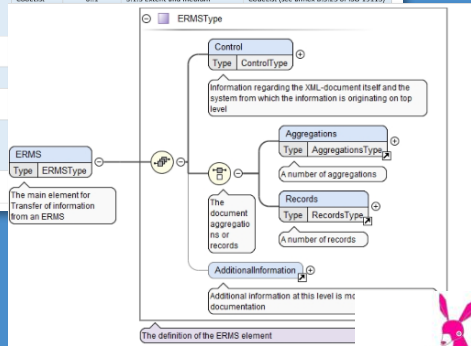

INSPIRE el. Nr.	INSPIRE el. Name	Explanation	Metadata data type	Proposed Cardinality	ISDG code	Comments
2.2.1	Resource title	Name by which the cited resource is known	text	1..1	3.1.2 Title	
2.2.2	Resource abstract	Brief narrative summary of the content of the resource(s)	text	0..1	3.3.1 Scope and content	
2.2.3	Resource type	Scope to which metadata applies	CodeList	0..1	3.1.5 Extent and medium	CodeList (see annex B.5.25 of ISO 19115)
2.2.5	Unique resource identifier	Value uniquely identifying an object within a namespace				
2.2.6	Coupled resource	Provides information about the datasets that the service operates on				
2.2.7	Resource language	Language(s) used within the datasets				
2.3.1	Topic category (INSPIRE specific)	Main theme(s) of the dataset				
2.3.2	Spatial data service type	A service type name from a registry of services

E-ARK3 is currently conducting a Training Needs Analysis for digital archiving as part of the Connecting Europe Facility (CEF) eArchiving Building Block. The need for eArchiving training has never been greater. In the last two decades, governments, businesses and individuals have become increasingly digital. So much so that ninety per cent of the data in the world today has been generated in the last two years.

Data on this scale brings opportunities but it also brings challenges. The problem for memory institutions is that archiving even a small fraction of this data will become a massive burden. Long-term repositories dealing with this deluge must implement appropriate specifications, tools and workflows capable of processing huge quantities of information in an increasing variety of formats. Organizations in the archiving ecosystem need to be aware of the different approaches, systems and formats that can be implemented.

The aim of E-ARK3 is to promote a deeper engagement with and access to, eArchiving services. One of the ways that we will achieve this is by offering training. The following Training Needs Analysis will help ensure that the training developed is appropriate for our target communities, and meets their actual needs.

Your contribution to this questionnaire will help shape this training. Please encourage your colleagues and staff to respond. It should take about 10 minutes to complete.

CEF eArchiving Webinar #2 - "Introduction to ESSArch – an open source-based solution for long-term preservation of digital information"

Created by Sophia BUNEMANN, last modified by Thomas FILLIG on May 13, 2020

About this webinar

On **26 March 2020 (10.00 – 13.00 CET)** this live Webinar, followed by an interactive Q&A session, introduced ESSArch- an open source-based solution for long-term preservation of digital information.

In the second of the CEF eArchiving Building Block's training webinars, Andreas Segerberg and Björn Skog introduced ESSArch, an open source archival solution compliant to the OAIS ISO-standard and a part of the Sample Software Portfolio in the Building Block. ESSArch consists of software components that provide functionality for Pre-Ingest, Ingest, Preservation, Access, Data Management, Administration and Archival Management. ESSArch has been developed together with the National Archives of Sweden and Norway. Every software component of ESSArch can be used individually and also be easily integrated together to provide overall functionality for producers, archivists and consumers.

The live webinar, followed by an interactive Q&A session, was an opportunity for attendees to:

- learn about ESSArch, its functionality and components
- gain insight into how ESSArch supports the E-ARK-specifications and Submission Agreements
- find out how the system can support your organisations workflows and needs

Participants **submitted questions** and suggested **discussion points** beforehand using the comments section below or by sending an email to CEF-BUILDING-BLOCKS@ec.europa.eu.

The Creator Organisation, in our case, would often be the local government body for which I work. But it would also often be a third party which is depositing records with us. Can third-party organisations have an interface with the Producers part?

Yes. An export from a source system can be packaged by the ESSArch Pre-Ingest functionality automatically, semi-automatically or manually. Even details about the depositing organisations can be added as metadata.

Introduction to ES Solutions and ESSArch

Please watch this introductory video before starting the course

The video thumbnail features a dark blue background with the following content:

- ESSArch** logo at the top left.
- A flow diagram showing 'eArchiving' leading to 'A solution for individuals, organisations and systems'.
- A URL: <https://github.com/E-ARK-Software/ESSArch>
- Five circular icons representing workflow stages: Pre-Ingest, Ingest, Storage, Access, and View.
- A list of features:
 - EZE Solution** – Covers the complete archival workflow
 - Open Source** – GPL licensed, Docker versions available
 - Submission Agreements** – Profiles, Policies, Workflows etc
 - EAIS** – Archival Information System (Digital & Analogue Archives)
 - Authorisation** – Flexible, Individual, Roles, Groups, Organisations
 - Validators** – Checksum, File format, Mediaconch, VeraPDF etc
 - Converters** – Unoconv, FFMpeg, GraphicsMagic, OpenSSL, SIE-CSV etc
 - Archive Management** – Preservation, Migration, Disposal, Scheduler etc
 - Connectivity** – REST API, Kibana, Datasette
 - Interoperability** – Encapsulation of Unidentified IPs (UIPs)
 - Trustworthy** – High Security & Isolated implementation capabilities
- Video controls at the bottom: AS (Andrew Leggett), J (Jaime), BS (Björn Ståhl).

Case Study

- Italian Central Archives

Case Study

Italian Central State Archives (ACS), Rome - Details

Archivio Centrale dello Stato

- Challenge: to Create a Digital Archive from scratch;
- Need for a comprehensive model of the whole archiving process;
- Analysed several models;
- E-ARK model chosen for extensive and sound methodology;
- Silvia Trani, State Archivist, attended Meet eArchiving event, December 2019;
- ACS onboarded CSIP, SIP, ERMS CITS in April 2020;
- Success story at <https://bit.ly/3o5KO3t>

Case Study

Italian Central State Archives (ACS), Rome - Benefits

- Specifications are based on real-life experience;
- Comprehensive and user-friendly documentation;
- A clear method to building the best-fitting solution;
- Freedom to mix and match specifications and solutions;
- A stable, friendly, open community;
- Free open-source software;
- Save time and effort in software development: time halved.

Create better online surveys and forms

Please fill in the form below if you wish to stay in touch with CEF eArchiving Building Block.

→ * Name

→ * Organization

→ * Email

Phone number

if you would like to be contacted by phone

→ * Do you wish to be contacted by a CEF eArchiving Building Block expert regarding the onboarding and adoption of the eArchiving Building Block for a planned or existing project?
 Yes
 No

<https://bit.ly/3iaDxwU>

Fill the simple questionnaire and we will get in touch with you

What can you do?

1

Join the specifications discussion and development

2

Start using the eArchiving specifications and open-source software

3

Provide feedback to help us improve solving your problems

4

Use our support services to help you get started

5

Become an eArchiving ambassador

6

Get involved and encourage your staff to get involved too

Is eArchiving for me?

Yes, if you need to guarantee access to your information in the future.

What we can help you achieve
